

# INTRODUCING TELEREHABILITATION

## TELEREHABILITATION

We are pleased to introduce "Tele-rehabilitation" as a new way to stay in touch with our clinicians. It is a fast and convenient way to stay connected with your clinician during these dynamic times. Covered by most insurance plans and easily accessible through a smartphone, computer or tablet. It is easy to use and can be done from the comfort of your home.

## WHAT IS TELEREHAB?

Telerehabilitation (or Telerehab) provides you access to our clinical staff conveniently through your smartphone, computer or tablet. It is similar to an office visit but through virtual means. Your clinician will ask you questions about your condition and develop a treatment plan that is customized to your needs. If you require any hands-on therapy, your clinician will provide options until you can attend the clinic for in-person treatment.

Telerehab is a secure way to access the care you need. Our software meets all regulatory requirements to ensure your privacy. We can prescribe exercises and education to ensure that you are progressing through the different phases of your recovery.

Clinical assessments and treatment include a detailed history and evaluation of your functional abilities within your environment. The ongoing treatment and monitoring is a full-spectrum service enabled by our software which is easily accessible through your smartphone, computer or tablet.

## Why Telerehab?

- Fast And Convenient
- Infection Control Benefit of Virtual Care
- In the Comfort of Your Home
- Covered by Most Insurance Plans
- Same Day Appointments
- Stay Connected With Your Clinician
